

The "James Bond" House.
House Design Idea for
Movie and Client

The James Bond House by Thailandarchitects.com

“A 5 star design service. Simply the best at what they do”

Thailand Architects.com unveiled its latest amazing design to an eager audience of property dealers and business tycoons. The 'James Bond house' was created specifically for a client involved in the movie business in Los Angeles. This world class luxury home raises the stakes in the 'Super Home' market, appealing to anyone looking for a one of a kind, deluxe property. Acclaim and applause flooded into Thailand Architects.com within a few days of its release. The combination of stunning design, imagination and functional space proved yet again this eclectic team of Thai architects, really are a force to be reckoned with. It is easy to see their unique position in the marketplace as top designers of first class homes. We spoke with Thailand Architects.com about their latest creation.

Initial Inspiration

This fabulous home was sparked by an idea by Creative Director, Chris Clayton. The combination of European ideas and Thai architects proved a winning formula. Chris has been involved in creative endeavours most of his life from all types of design, house construction, media design and even writing and producing songs at acclaimed Soul II Soul Studio's in London. His first project was when he was 18 years old when he helped re-design a Jacobean Mansion which had featured in the rock band, The Who's movie 'Tommy'. So he is certainly not short of imagination.

This new James Bond house truly is a testament to world class design. "The home was inspired by me but all credit goes to chief architect and friend, Chalong, and the rest of the Thai design team. They did a magnificent job."

5-star Features and Boundless Imagination

This incredible home boasts a plethora of features such as: a 30m garden swimming pool with sunken bar with geodesic dome cover; spacious illuminated patio areas with walkways, separate entertainment and barbecue areas with geodesic dome cover and a semi floating staircase to elevated balconies with glass sides. One of the prize features is an amazing interconnected series of swimming pools; each one flowing via a pool river channel which spans the whole length of the home, allowing you to swim from one end of the house to the other. There are also waterfalls, boulders and water curtains. In addition there is a central art piece with computerized water feature and fountain. Several bridges take you over the pool river channel to various parts of the home. The pool even surrounds the impressive dining area with wall to ceiling glass and inside bar. High-tech security systems, solar power and wind power also add to the overall wonder of this incredible property.

Inside the home is divided in to two parts, the living area and entertainment area. Walkways and lush tropical garden separate the two. There are saunas, steam rooms and changing rooms. There are also separate staff and maids quarters. The home sleeps 12 people in 6 spacious master suites with ensuite luxury bathrooms all with the very latest in deluxe bathroom furnishings. For eating there is a luxury hi-spec kitchen with breakfast area; also a large private entertainment room with private movie theatre, bar, office, pantry, laundry, games room and storage. There are carports that can house up to 20 cars and a sweeping drive to entrance the home.

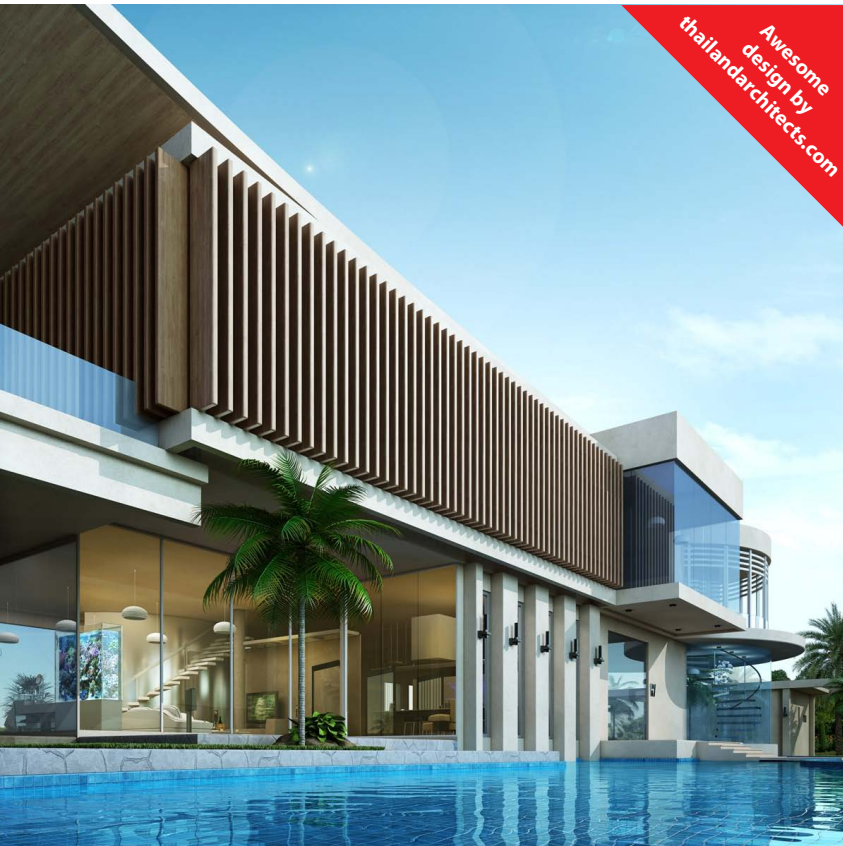

Home Automation-Smart Home System

If the above was not enough the guys really excelled themselves. The whole house is fitted with an automated high tech smart home system. This allows you to use touch screen panels in every room, to choose from a library of music and movies. Every room is fitted with flat screen TV's and all systems are interconnected. Lights and music can come on automatically at pre-set levels as you enter a room and turn off as you leave. You can check the home when you are overseas and turn lights on and off, set temperature controls, view security cameras and even have appliances turned on/off. The home has automatic temperature control in every room, which you can override and set on your own personal touch screen panels. Electronic curtains and blinds complete the experience. The home is fully automated.

Latest Clients and Projects

This small group of talented architects receives enquiries from all over Thailand as well as internationally. Recent projects include: two, twenty storey luxury apartment buildings with deluxe villas, on the beach in Kerala, India for Ravi Shankar; a VIP luxury home for the Managing Director of a Steel company in Mumbai; a Thai-style traditional holiday home in Khao Yai National Park; a 5-bedroom Avant-garde home for a Singaporean businessman on the Phoenix Golf Course in Pattaya. A Balinese style family home in central Thailand; a contemporary 3 bedroom home with pool in Hua Hin; a resort style house with pool, Jacuzzi and guest house in Cha am near the beach; a beautiful Thai-style resort home in Phuket with lagoon pools, lotus ponds and tennis courts; a 250 house development in India; two new homes for business people in Bangkok and 5 luxury houses in Chiang Mai.

I have seen many world class designer homes in my life but this is simply the best. It was completely designed by Thai architects and is a prime example of their fine abilities.
